

Eagle E265 Platform

The Eagle E265 is an automated trolley that can be used for part delivery or can be equipped with a trailer hitch for use as a low cost trolley. The Eagle E265 is capable of carrying loads up to 250 lbs. with a towing capacity of 500 lbs. These mobile robots can replace conveyors or manual pickup/delivery systems with a flexible automated system that links all production areas in a factory or warehouse.

An electro-mechanical drive unit allows for a great deal of flexibility in movement and speed. The single wheel suspension keeps the drive wheel in contact with the floor at all times. All wheels feature extra thick polyurethane tread for long life and noiseless operation. Electro-mechanical brakes are included as an integral part of the permanent magnet motor and sealed gearbox assembly. Each Eagle E265 is equipped with a 12-volt battery power source. Vehicle mounted slow-down sensors monitor obstructions while the vehicle is in motion.
